Bavaria™ is one of the world's leading manufacturers of flight simulators and is already established as a pioneer in "Hollywood-style" in-flight entertainment. With a powerful virtual cockpit, photorealistic scenery and features that can be easily integrated into the sim, Bavaria has been a leader in the aviation market for many years. Today Bavaria is the market leader in virtual cockpit. In 2014 the Bavaria Group was acquired by FlightSimLabs and became part of the FlightSimLabs family of brands. Read more about the history of Bavaria's software and about the company and its products in the Bavaria products section of our website. Features In-Operator: You may create a user account with a different name and a different email address and use the account with your favorite in-flight entertainment provider. Your user account is linked to a single in-flight entertainment provider account that you manage via the account management portal. The User Account allows you to create different user

accounts per provider. To access one of these accounts, you simply log-in to the in-flight entertainment provider account management portal. Note that you may not create an account on an in-flight entertainment provider and simultaneously log-in to a user account on a flight simulator platform, and vice versa. Please make sure that the in-flight entertainment provider account you use to purchase the Add-On with is tied to a credit card that can be charged, and has the card number and expiration date that you will be using. The Add-On may not be available with an account that has a different billing address than the one provided to the in-flight entertainment provider. In-flight Entertainment providers In-Flight Entertainment Provider list Please see the above link for more information about the features available to the user accounts linked to the in-flight entertainment provider accounts. Flight SimLabs is an innovative, leading flight simulator platform provider, using the best available technology to produce authentic flight simulation. Our aim is to provide you with an experience like no other. Read more about the history of Flight SimLabs in the Flight SimLabs products section of our website. Our platform is supported by an extensive network of certified engineers and a growing team of top-flight technical experts. These include certified high fidelity flight dynamics engineers, certified turn-key platform engineers, certified high fidelity aircraft interior engineers, certified Dassault certified avionics engineers, certified 82157476af
